Window Film

# FLOWER FILM

These flowered films which are made on the basis of photos offer the striking realism. The decorative aspect is visible from both sides of the glass and transparency of motives allows light to pass, and makes the sunlight spread the colored reflections on walls. The ink used for film production has a strength graded 8 on the blue colors scale. This means that it provides outstanding resistance to discoloration: the colors remain bright and do suffer neither from time nor from sunlight.
